Summary

Beacon 3D scanner mount for Sovol SV06.

[3D Printers](#) > [3D Printers - Upgrades](#)

Not compatible with SV06 stock part cooling fan. Several rear-mounted parts cooling fan mounts available on this site. I use a 5015 fan.

Remove stock Z probe & mounting bracket.

Required Hardware:

- M3x5mm heat insert for blind hole (blind hole is 10mm deep, so insert heights other than 5mm will work too)
- M3 hardware that ships with Beacon - I used one short to mount to the heat insert and had to shorten the longer screw with a grinder to mount to the bottom of the extruder
- Can re-use existing M3 screw that held the mounting bracket for the stock Z probe

For beacon section in klipper config:

X offset: 0

Y offset: -17.42
